

The flow of minerals through the economy (2012<sup>(1)</sup>, £bn)

Notes: <sup>(1)</sup> Where data is not available, GVA estimates were extrapolated. Official GVA data in the Annual Business Survey covers two thirds of the economy, accounted for the UK non-financial business economy. Our total economy GVA estimate therefore extrapolates the data to achieve a UK total.

<sup>(2)</sup> Includes mining support activities. <sup>(3)</sup> Covers only the production or manufacture stage, not the distribution or any other associated services.
